How AutoEntry works...

AutoEntry reads information from scanned or photographed paper documents moving those dates and figures into your digital files and accounting software. So, this means no more manually entering invoices or receipts.

You can get started in 3 simple steps:

AutoEntry will now extract and analyse the data from this document. Once completed, items will appear in your inbox for you to approve and post into your accounting solution.

AutoEntry - A new favourite colleague

AutoEntry offers a range of features and benefits, allowing your business to work smarter and faster. Here's how...

Time Saving

No more manually inputting invoices, receipts, expenses or statements. AutoEntry extracts the data you need and transfers it to your accounting solutions.

Auto Publish

AutoEntry remembers how you process invoices and receipts, including which supplier account or tax codes you assign.

Capture any Document

AutoEntry accurately captures the key information from almost any type of paper document, including bank and credit card statements, bills, invoices, receipts and more.

GDPR-Compliant Cloud Storage

Once AutoEntry has posted your information, it securely stores all of your data in the cloud, available at the touch of a button.

Real Time Data = Real Time Solutions

Real time data allows you to see where you stand right now. Having this instant data allows you to address any problem straight away.

Improved Processes

AutoEntry takes the pain out of manually entering data. This benefits everything from collaboration to workflow to remote working.

Seamless Integration

AutoEntry integrates with all major accounting software in the market.
